Experience

SR. SYSTEMS ANALYST, DYNAMICS TECH LEAD

CHESTERFIELD COUNTY INFORMATION SERVICES TECHNOLOGIES

RICHMOND, VA – 2015 - current

Senior systems analyst working with local government to modernize business processes and systems.

Success stories:

- ✓ Dynamics 365 Online - Developed social services welfare payment system using 95% OOTB Dynamics 365 configuration tools which shepherded in the county's first cloud implementation and decommissioned two mainframe applications which served the county's needs for over 20 years.
- ✓ Business Process Re-engineering - In preparation for systems modernization, facilitated extensive interviews with subject matter experts and management to identify opportunities for process change to support efficiency improvements aligned with new systems.
- ✓ Mainframe Decommission Testing Phase - Test planning and execution on mainframe to Micro Focus migration.

Awards/Recognition

- ❖ Recipient of the Innovative Use of Technology in Local Government award at the 2017 Commonwealth of Virginia Innovative Technology Symposium
- ❖ Recipient of the National Association of Counties (NACo) award
- ❖ Project success being used by Microsoft in their case study marketing.

SR. SYSTEMS ANALYST & SCRUM MASTER

VIRGINIA DEPARTMENT OF MOTOR VEHICLES

RICHMOND, VA – 2012-2015

Senior technologist on DMV modernization team responsible for implementing state-of-the-art systems and decommissioning legacy applications, including MVS mainframe.

Success stories:

- ✓ ScrumMaster - Coached two major Web development projects with multiple work streams; each with its own team, backlog, and schedule. Performed in multiple roles; scrum master, systems analyst, test engineer to retire legacy technology and deliver real-time data exchange between DMV and external business partner.
- ✓ Microsoft Test Manager adoption - spearheaded the first implementation of Test Manager 2012 in the enterprise to manage test planning, execution, and tracking.
- ✓ Visual Studio Scrum Process Template adoption - thought leader and evangelist for the agency's first adoption of the Scrum Process Template to manage the Agile project teams, resulting in efficiencies in backlog grooming, sprint execution, planning, and retrospectives, bringing transparency to business stakeholders, including the extensive use of Sharepoint portals and Powerpoint storyboarding.
- ✓ Issuance of Vital Records - Sr. Systems Analyst on legislative-driven system change to support the issuance of vital records at DMV branch locations via implementation of real-time data exchange between state agencies via WCF Web services.
- ✓ Motor Carrier System Discovery - Research analyst on systems discovery effort to document all as-is systems and business processes and develop a blueprint for systems modernization.
- ✓ Web-based online help - authored application help for users of customer servicing system.
